Frameworks & Libraries: Node.js | Express.js | React | Socket.io | Django  
Data/Tools: MongoDB | Git | Postman

## PROJECTS

### Simple Manga Reader 🍷

May 2021 – Jul 2021

REACT | NODEJS | EXPRESS

- Collaborated to develop a web app allowing users to read manga from MangaDex's extensive catalogue and Imgur albums
- Utilized MangaDex and Imgur APIs to make GET requests to retrieve manga titles, chapter names and images
- User client built using React with React routing; user search query displays most similar titles on MangaDex
- Hosted Express CORS proxy server to handle CORS headers in requests

### Play Tic Tac Toe 🍷

Dec 2020 – Jan 2021

REACT | NODEJS | EXPRESS | SOCKET.IO

- Developed a Tic Tac Toe web application, allowing for real-time multiplayer with other users in private rooms
- User client built with a React front-end; users will select their own game and room IDs on the join page
- Employed usage of Socket.io rooms to create private games and localize event changes
- Connections are routed to and kept inside a waiting room until another user joins their private room

### Password Manager

Aug 2021

REACT | NODEJS | EXPRESS | MONGODB(MONGOOSE)

- Created password manager REST API endpoints with Node.js and Express, utilizing Google OAuth 2.0 for user authentication and endpoint protection
- REST API endpoints implemented using Express and MongoDB to allow for CRUD operations

### Your Spotify Stats 🍷

Jul 2021

REACT | NODEJS | EXPRESS |

- A Spotify stat tracking app allowing users to view their most listened to artists and songs in the past month, past 6 months, and all-time
- Built with React, Express and Node.js to implement end points and sessionStorage to keep users authenticated

## EXPERIENCE
